(At a night market)

Tina: Do you know two of the students from Shih-Chien University won the design award because they made a cup "Float"?

Ryan: I have no idea. What's so special about the cup?

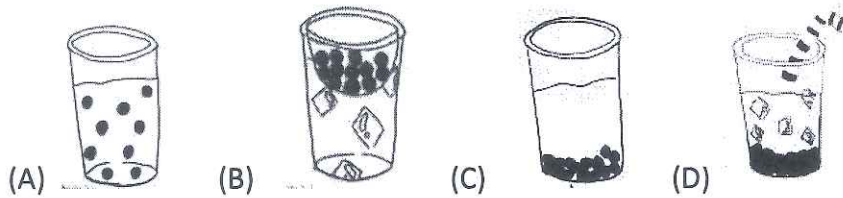

Tina: Handmade drinks are an important part of life in Taiwan. To eat the toppings, most people must use straws to have their drinks. But most of them are plastic. They are bad for the earth. With "Float", we can enjoy our drinks without straws because there is a smaller cup inside it. It can make those toppings together near the cup mouth. Besides, "Float" is made of glass, so it can be reused.

Ryan: Wait a minute! You mean we can enjoy the fun of drinking and show our love to the earth at the same time.

Tina: That's right!

Where do all the cute puppies and kittens in pet stores come from? Some are from the breeders, and they provide healthy and loving environments for their pets. However, many of them are from kitten factories. The animals are raised in terrible conditions there. The pens are pretty small and dirty, so there are more and more unhealthy pets there.

Sadly, many of the cats and dogs are bought from stores and die in animal shelters because people have a hard time with caring for them. In the US alone, one cat or dog is put down every eight seconds, totaling four million deaths each year.

Luckily, Los Angeles, California, is doing something about it. In January 2019, the city became the first to impose a ban. The pet shops cannot sell these commercially bred animals. If you don't follow the new law, you'll be fined US\$250 for the first offence, double that for the second time, and double that for the third. This is sure to reduce the number of kitten factories.

*This is a letter by Selena Bieber to the students in her school.*

**Later Is Better!**  
**Selena Bieber**  
*Northville High School*

Do you feel it's hard to get up early for school and even harder to listen well in the first class at 8 a.m.? Well, this happens to most of us and is not helpful for our learning!

Some studies show that teenagers' brains make melatonin, a kind of hormone, between 11 p.m. and 8 a.m. And it helps sleep. So it's better for us to sleep during these nine hours. But here comes the problem. We have to get to school by 7:30 a.m. That means we have to get up before 7, but our brains should still be sleeping at that time. That's why we're always so tired and can't think clearly in early morning classes. No clear head, no good learning, right?

If we can't change our sleeping hours, why can't school start later? In this way, we can sleep more and learn better!

Want to help us make it happen? Visit [www.nvhsstudsup.org/later-better](http://www.nvhsstudsup.org/later-better) to learn more.

  - (C) Too many students are late for school.
  - (D) Lunch break is too short for taking a rest.
  
- ( ) 15. What can we learn from the letter?
  - (A) Too much melatonin can hurt teenagers' brain.
  - (B) The brain stops making melatonin after 11 p.m.
  - (C) Sleeping longer helps the body make more melatonin.
  - (D) It is easier to fall asleep when the brain is making melatonin.
